SAFEGWAY CONVERSION ADAPTORS

S25-4-1 Allows connection of a SafeWay or other I.S.O. male tip to a cone style John Deere female coupler. Hook-up to the John Deere Old Style casting can be accomplished with pressure in the implement line. Activating the levers will start oil flow.

S25-4-7 Allows connection of an I-H style male tip to a SafeWay or other I.S.O. female coupler. Our special shielded valve retainer eliminates flow-checking when connecting to a connect under pressure type coupler like SafeWay's S70 Series.

S25-4-2 Allows connection of a SafeWay or other I.S.O. male tip to an Old Style I-H female coupler. Hook-up to the I-H lever casting can be accomplished with pressure in the implement line. Activating the levers will start oil flow.

S25-4-7D Allows connection of an I-H style male tip to a 50 series John Deere I.S.O. casting or other I.S.O. female couplers. Our unique double shut-off feature eliminates oil spillage when disconnected. Adapter may be left installed in the tractor without further loss of oil.

S25-4-3 Allows connection of a John Deere cone style male tip to a SafeWay or other I.S.O. female coupler. Our special shielded valve retainer eliminates flow-checking when connecting to a connect under pressure type coupler like SafeWay's S70 Series.

S25-4-8 Allows connection of a J.I. Case Old Style male tip to a SafeWay or other I.S.O. female coupler. Our special shielded retainer eliminates flow-checking when connecting to a connect under pressure type coupler like SafeWay's S70 Series.

S25-4-3D Allows connection of a John Deere cone style male tip to a 50 Series John Deere I.S.O. casting or other I.S.O. female couplers. Our unique double shut-off feature minimizes oil spillage when disconnected and may be left installed in the tractor without further loss of oil.

S25-4-9 Allows connection of a John Deere cone style male tip to a J.I. Case Old Style female coupler. Our special shielded retainer eliminates flow-checking.

S25-4-4 Allows connection of a John Deere cone style male tip to an Old Style I-H female coupler and others of that style. Hook-up to the I-H lever casting can be accomplished with pressure in the implement line. Activating the levers will start oil flow.

S25-4-10 Allows connection of a J.I. Case Old Style male tip to a John Deere cone style female coupler. Hook-up to the John Deere Old Style casting can be accomplished with pressure in the implement line. Activating the levers will start oil flow.

S25-4-5 Allows connection of an I-H style male tip to a John Deere cone style female coupler. Hook-up to the John Deere lever casting can be accomplished with pressure in the implement line. Activating the levers will start oil flow.

S25-4-6 Allows connection of a SafeWay or other I.S.O. male tip to the Old Style J.I. Case female coupler. Our special shielded retainer eliminates flow-checking.
